

Every PP4 < 0.40 across all genextrait colocalizations; well-powered ROCK2/ROCK1 all <0.10. T2D = FinnGen R12 (82,878 cases). n.t. = not tested (ROCK1/RHOA fibrosis beyond cirrhosis). * RHOA weak instrument (1 eQTL SNP, F=27) → coloc underpowered. (b) Positive controls require the mechanistically correct tissue: SORT1→LDL colocalizes in liver (1.00) not blood (0.00); KCNJ11→T2D in blood (0.89). NASH PP4=0.093 underpowered (254 cases).
